

Aaron Cochran, Front End Developer - 785-727-8816

My name is Aaron Cochran, I'm a Front End developer focused on building accessible, mobile friendly interfaces and applications. I enjoy teaching others and working with a full team of creative people to build the best product possible. I enjoy learning new things, playing and writing music, and hiking in new places.

Skills and Abilities

HTML - CSS - Various CSS architecture patterns - Javascript - JQuery - AJAX - API integrations - Front End tooling (webpack, babel, grunt, npm) - PHP - VueJS - Laravel - GIT - Design Principles - Wordpress - Woocommerce - Problem solving - Multi-tasking - Time management - Detail oriented - Fast learner - Teaching others

Education

Eudora High School 2008

Graduated with honors
Eudora, KS

Emporia State University 2010

Music Production & Music Business
Emporia, KS

Johnson County Community College 2012

Interactive Media & Web Development
Overland Park, KS

Work Experience

CTO

Lifted Logic | 2018 - current

As CTO, on top of still developing sites full-time, I overhauled and enforced coding standards. I also worked closely with the design department to come up with a better system of communication between development and design to help bridge the gap between technical and non-technical employees. We worked together to develop a component based design and development workflow. I also meet with clients to help determine the technical scope of projects.

Work Experience Cont.

Lead Developer

Lifted Logic | 2016 - 2018

As the Lead Developer, I helped maintain coding standards through code reviews as well as trained new developers on staff. I also took on more complicated projects including building Laravel / Vue Applications from scratch and writing / integrating APIs for various POS and CRM systems.

Front End Developer

Lifted Logic | 2015 - 2016

As a Front End developer, I worked with designers to build out custom Wordpress themes from scratch. I also worked with and maintained inherited codebases. These ranged from other Wordpress sites, to full blown applications built on various tech stacks such as MEAN or Laravel apps.

Assistant Store Manager

Pizza Hut, NPC International | 2012 - 2015

Responsible for training and development of staff. Maintaining standards. Recruiting and interviewing new team members. Accountable for counting and transporting large amounts of cash as well as tracking and hitting store goals with labor, sales, and food cost.
